

Help in setting up consortia is one of the key objectives of the InnovARC project. These consortia must comprise at least one French-Swiss pairing from the Jura Arc, including at least one business, with a possible opening for external partners. **The projects completed under MinnovARC, innovation areas of the future and trends identified in the workshops, as well as the dissemination of European calls for project proposals constitute a reservoir on which businesses can draw and laboratories facilitating the emergence of new projects.**

This support comes from the project team, but also in the form of external services (facilitation of creativity sessions, technical feasibility studies, market/risk analyses, business models and help with putting together European projects, etc.) provided by players that support innovation:

FRANCE	SWITZERLAND
<b>Public-sector players:</b> competitiveness hubs, clusters, professional organisations, Franche-Comté Innovation Network, Bpifrance, SATT (Société d'accélération du transfert de technologie), FC'INNOV, etc.	<b>Public-sector players:</b> economic departments of the four cantons involved, universities and other higher education institutions, regional and inter-cantonal players that support innovation, etc.
<b>Private-sector players:</b> nine service providers dedicated to innovation selected by tender procedure	<b>Private-sector players:</b> an evolving network adapting to projects' needs

#### 4. Financing and support of project consortia.

**Consortia  
awarded  
InnovARC label**
